

Grandparents' Day Celebration

Grandparents are the family's greatest treasure, the founders of a loving legacy, the greatest storytellers, and the keepers of values and traditions. Through their special love and care, grandparents keep a family close at heart. Whether maternal or paternal, grandparents have a very special and important role to play in their grandchildren's lives. The parents of both the families are equally cherished and loved and are yearned to be with, by the little darlings.

Kapil Gyanpeeth, with its firm belief that Grandparents are the firm foundation of any family and they nurture children to reinforce the values that help them lead meaningful lives organised a Story Telling Activity by Grandparents on 23 October 2021 for grandparents of students studying in Classes II to V. The theme of the activity was based on stories about freedom struggle events.

There are some stories and life lessons that only grandparents can teach us as they have garnered wisdom and experiences that are so essential for imparting to kids at a young age.

Students attentively listened to the anecdotes shared by the Grandparents about freedom struggle and differences between their and present time. Students performed a scintillating performance to express their love and respect which was greatly applauded by the grandparents. The sight to behold was the beautiful dance by the children with their grandparents on foot tapping music.

Vice Principal Ms Reena Agarwal welcomed and thanked the grandparents. She emphasised upon the importance of grandparents in each house and asked the children to take care to spend time with them and learn as much as possible because things taught by them are precious for the social and emotional development of children. With changing family patterns, increased life expectancy, growing numbers of dual-worker households and higher rates of family breakdown, grandparents are now playing an increasing role in their grandchildren's lives.

Such initiatives are much needed at the present time when technology has infiltrated our lives. Children will get moral education and affection while listening to tales from grandparents. It's the easiest way to touch, teach, and reach a student.
